Minister to the modus operandi
David Kpelle and Korothoum Doumbia by NGOs and farmers, 11-02-09, Abijda
Emerging Issues

All the issues, the NGOs put on the table in Accra are taken into consideration.

We appreciate it very much!
NGOs are considered as Watchdogs and we are partners in development!

We are willing to share our rich experience and knowledge in realizing a sustainable cocoa sector!
We acknowledge the support of RSCE in facilitating our participation!

5 years ago we had assisted Nana to adopt best known practices on his cocoa farms, he would not be confronted with major challenges related to sustainability today.
What has been the missing link?

Plan of Action!
before Trinidad:

To involve all stakeholders actively in the process (WCF, COPAL, ...)

Include in the Trinidad program enough time to define a clear plan of actions with all stakeholders.
In order to reach the demand of 3,300,000 t of cocoa beans in 2012, we should develop concrete actions for every stakeholder group!
Just imagine him...

This Saturday:

every Chinese and Indian boy wants to give his beloved a chocolate for the Valentine’s day, what will happen?

Can we meet the demand ??
Please!!

taste the future demand of sustainable cocoa!!
